Revista de Biología Tropical / International Journal of Tropical Biology and Conservation

Dear Sir/Madam,

According to the recommendations of the “Text and illustrations format corrections guide from associate Editors”, we are submitting a second version of the article:

“Cellular development of the germinal epithelium during the adult reproductive life history of the Golden Mussel *Limnoperna fortunei* (Bivalvia: Mytilidae)”.

We would like that our figures (1 to 6) be color printed, and we agree to pay for this service and extra pages.

Sincerely,

Claudenice Dei Tos, Irani Quagio-Grassiotto & Talita Sarah Mazzoni
