The **Revista de Biología Tropical** has been published without interruption since 1953, has worldwide distribution and a high *Science Citation Index* rating. Issues are published each March, June, September and December. Normally, several supplements are also published each year (not included in subscription).

La **Revista de Biología Tropical** se publica ininterrumpidamente desde 1953, tiene distribución mundial y una alta evaluación del *Science Citation Index*. Se publican cuatro fascículos anuales (marzo, junio, setiembre y diciembre). Normalmente, también se publican varios suplementos cada año (no se incluyen en la suscripción).

---

## Scope

The journal publishes articles in all fields of tropical biology and conservation. Selection criteria are the amount of new information, quality, and interest to a general readership. Studies with a strong experimental design, prolonged field work and taxonomic-systematics studies of whole groups are typical of the type of papers that are accepted, while preliminary studies and highly specialized reports are not.

## Why submit?

**Fully indexed:** Web of Science, Science Citation Index, Current Contents, Google Scholar, Scopus, Biological Abstracts, Zoological Record and 41 more. **Open Access** (more likely to be cited). For authors: ten first printed **pages free**. **Rapid** publication; widely read in countries with the highest biodiversity, where your article can have the greatest real **impact**. A dedicated staff gives you **personalized treatment**.
