Editor de la Revista Biología Tropical

We requested the review of the work entitled " Pollen morphology compared between four species from the *Jatropha* genus (Euphorbiaceae) in Northwest Mexico " to be considered for publication in the journal **Biología Tropical**.

We warrant that the manuscript represents original work that is not being considered for publication, in whole or in part, in another journal, book, conference proceedings, or government publication with a substantial circulation.

We warrant that all previously published work cited in the manuscript has been fully acknowledged.

We do not have any real or perceived conflicts of interest.

We warrant that all of the authors have contributed substantially to the manuscript and approved the final submission.

Our contribution for the Journal is a novel description of pollen morphology of four *Jatropha* species using the scanning electron microscopy technique to compare surface shape and texture of pollen grains, to date whose palynodata has not been provided by other researchers

We are agree to pay excess page fee charges if required,.
